

Auditel Business Health Check

from the UK and Ireland's leading cost management specialists

lowering the cost of doing business

An in-depth examination of all your business costs using Auditel's unique Total Cost of Purchase®

Auditel's Total Cost of Purchase® model differs from traditional cost analysis or expense reduction consultancy. It takes into account all the costs – both direct and indirect – associated with making effective cost management decisions.

As well as our core areas of specialisation – Communications, Energy, Business Consumables, Water and Sewerage – Auditel have the expertise to help you manage a much broader range of overheads. (See opposite page for details.)

Best of all, our flexible terms of business mean that you choose how you work with us – from the beginning. That way, there are no unexpected fees, no hidden charges and no extras.

With over 15 years experience, you can rely on Auditel to manage your business overheads, allowing you to focus on your core business activities.

There are four key steps to the Auditel approach:

1

Assessing your essential business costs

2

Identifying and reporting on saving opportunities

3

Realising the savings

4

Saving into the future
